EDUCATION

Indian School of Business (ISB), Hyderabad & Mohali

Advanced Management Programme in Business Analytics (AMPBA) | Jan 2025 – May 2026 | CGPA : 3.75 / 5

- **Core Coursework:**
 - Classical Machine Learning Algorithms (like SVM, PCA, LDA, Survival Analysis) and packages (like Scikit-learn, Keras, TensorFlow, PyTorch)
 - Deep Learning, NLP, GenAI and LLMs (with introduction to Hugging Face Transformers, LLM fine-tuning)
 - Knowledge Graph and RAG systems with practical assignments to convert Internet information to a Chatbot
 - Advanced Statistical & Optimization Techniques like Linear Programming, Mont-carlo, Simulation with RISK Package on Excel
 - Business & Industry-Specific Analytics Applications like Supply chain, Financial, Marketing and Digital Social Media Analytics
- Emphasis on translating analytical insights into business impact through case-based learning, capstone projects, and leadership frameworks.

MITx – Micro Masters in Supply Chain Management | May 2023 – Dec 2023

- **CTL.SC0x – Supply Chain Analytics** (Aug 2023) | 78% (**Letter Grade : C**)
- **CTL.SC1x – Supply Chain Fundamentals** (Dec 2023) | 85% (**Letter Grade : B**)
- **Key Concepts:** Optimization (constrained & unconstrained), Regression, Central Limit Theorem, Network Flows, Shortest Path, Traveling Salesman Problem, Vehicle Routing Problem.

National Institute of Technology (NIT), Srinagar

Bachelor of Technology – Mechanical Engineering | Aug 2011 – Jun 2015 | CGPA: 7.33 / 10

PROJECT EXPERIENCE

1. **Ops Intel : AI-Driven IT Operation Management Platform (Capstone Project – ISB AMPBA [Link](#))** : A comprehensive AI-driven IT operations management platform that integrates multiple machine learning models to optimize IT service delivery. The platform features :
 - a. **Ticket Analytics:** NLP-based ticket classification, priority prediction, and automated engineer assignment
 - b. **SLA Prediction:** Classical ML models predicting SLA breach probability with risk band classification
 - c. **Asset Survival Analysis:** Predictive maintenance model estimating asset failure risk and remaining useful life
 - d. **Inventory Optimization:** Automated procurement planning with cost optimization algorithms
 - e. **Executive Dashboard:** Real-time KPIs including cost savings, downtime reduction, SLA compliance, and strategic recommendations
2. **NLP — Transformers, RAG, Web Scraping & Text-to-SQL ([Link](#))** : NLP systems in practice combine multiple capabilities: **classification**, retrieval-augmented generation (**RAG**), evaluation, and **building structured datasets** from the web and **Natural Language based querying** form the build data base like a chat bot enabling .
3. **Forecasting App — Florida Energy Demand Forecasting ([Link](#))** : Built an end-to-end Florida Energy Demand Forecasting application with a modular Python training/prediction pipeline and interactive **Streamlit** interface. Developed a reproducible forecasting workflow covering data preparation, feature engineering, model training, prediction, and interactive visualization. Containerized the application using **Docker**, enabling portable, deployment-ready execution across local and production-like environments.
4. **Knowledge Graph–Enhanced RAG (Wikipedia + Neo4j) ([Link](#))** : Implemented a **Knowledge Graph–Enhanced RAG** system combining Wikipedia data with Neo4j graph and vector retrieval for improved contextual question answering. Built an end-to-end pipeline using **LangChain**, embeddings, **vector search**, and **graph queries** to leverage both semantic similarity and structured relationships. Developed a reproducible KG-RAG workflow covering document ingestion, chunking, indexing, retrieval, and LLM-powered response generation.

PROFESSIONAL EXPERIENCE

Razor Group GmbH | Senior Data Scientist | Jan 2022 – May 2026 (Remote)

Departments: Commercial (Forecasting), Tech & Analytics, Inventory Automation

- **Commercial Decision Engine – Forecasting** : Scaled legacy forecasting systems from **3K to 30K SKUs**, significantly improving commercial planning accuracy.
- **Product Opportunity Sourcing Engine** : Identified white-space opportunities for new product launches across geographies to replace EOL products and expand portfolio depth using Generative AI for automated processing.
- **Purchase Order Automation – Inventory Optimization** : Developed an algorithm to prevent inventory OOS by automating PO sizing using demand forecasts, lead times, inventory buffers, and logistics data. Reduced PO planning cycles from **3–4 weeks to 3–4 days** and **cut OOS rates by ~50%**.

Freshnear Technologies Pvt. Ltd. (Meesho) | Senior Business Analyst | Jul 2020 – Dec 2021 (Remote)

Departments: India Monetization & International Expansion (Indonesia)

- **Ads Monetization & BI Platform** : Developed automated recommendation engines for Ads Sales, improving supplier targeting and operational efficiency.
- **Indonesia – Fulfilment & Experience (F&E) and CX** : Managed data pipelines supporting daily supplier performance tracking.

OYO Hotels & Homes Pvt. Ltd. | Program Manager | Jul 2019 – Jun 2020 (Kolkata) : Built sales and supply performance monitoring system for offline micro-markets. This enabled **3× growth in sales performance**, sustained for 4 months prior to COVID-19 slowdown.

Flipkart Internet Pvt. Ltd. | Product Analyst | Jan 2019 – Jun 2019 (Bangalore) : Analysed customer behaviour across the Payments funnel to identify drop-off drivers.

Mu Sigma Business Solutions Pvt. Ltd. | Decision Scientist | Oct 2015 – Dec 2018 (Bangalore)

Key Client Programs (Insurance & Banking):

- Delivered vendor performance analytics driving **\$400K monthly cost savings** and improved CX scores.
- Led development of enterprise-wide commercial KPI portals, consolidating multiple legacy systems into a single analytics platform.

Awards @ Mu Sigma:

- **SPOT Award – Nov 2017** | “For driving the project as a Tableau lead along with picking up additional data development responsibilities and enabling efficient client conversations through structured problem solving & clear thought process”
- **SPOT Award – Apr 2016** | “For winning the trust of the client through discipline, quality delivery and creativity to make the engagement successful”

CERTIFICATIONS & SKILLS

Certifications:

- Applied Data Science @ IBM (Coursera) - [Link](#)
- TensorFlow in Practice @ deeplearning.ai - [Link](#)
- Decision Scientist – Beginner @ Mu Sigma University
- Leadership and Emotional Intelligence @ ISB (Coursera) - [Link](#)
